WXR3 **Rework Station** (NEW)

Multifunctional WXR3 can be used simultaneously with a soldering iron, desoldering iron and hot air pencil.

■ Up to three 200w high performance tools can be operated simultaneously for up to 600 watts of total power on the 3-channel, WXR3 rework system

■ Used for soldering and desoldering of both large and small SMT components

■ 2 internal pumps provide the sources for hot air, desoldering vacuum and a vacuum pick up tool for a completely self-contained rework system

■ LCD display simultaneously monitors all parameters, connected tools and peripheral devices. Adjust parameter setting and other functions through menu.

■ Compatible with all WX tools, accessories, and peripherals
